

AI ASSISTANT CODING

ASSIGNMENT-14.4

Name: K.hitesh

Roll No:2303a51291

Batch:05

Task 1: Responsive Homepage Layout for a Startup Website

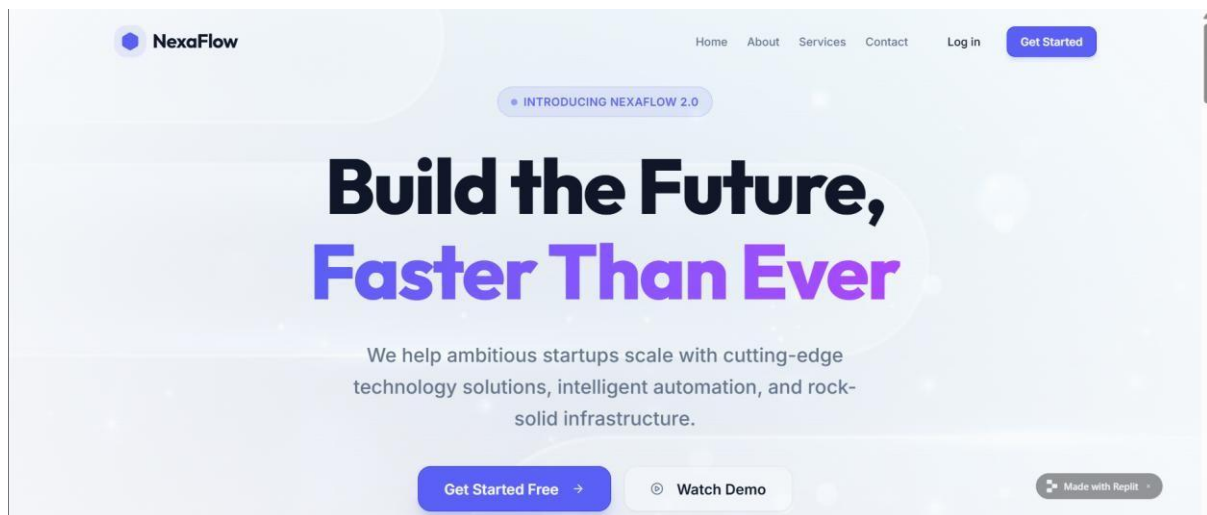

Scenario: You are designing a basic homepage for a startup company that needs to look good on desktops, tablets, and mobile devices.

Prompt:

Design a modern, responsive startup homepage that works on desktop, tablet, and mobile. Include a navbar, hero section with CTA, features grid, about section, testimonials, and footer.

Use a clean UI, mobile-first design, and ensure responsiveness with Flexbox or CSS Grid. Provide HTML and CSS code with smooth layout adjustments across screen sizes.

Output:

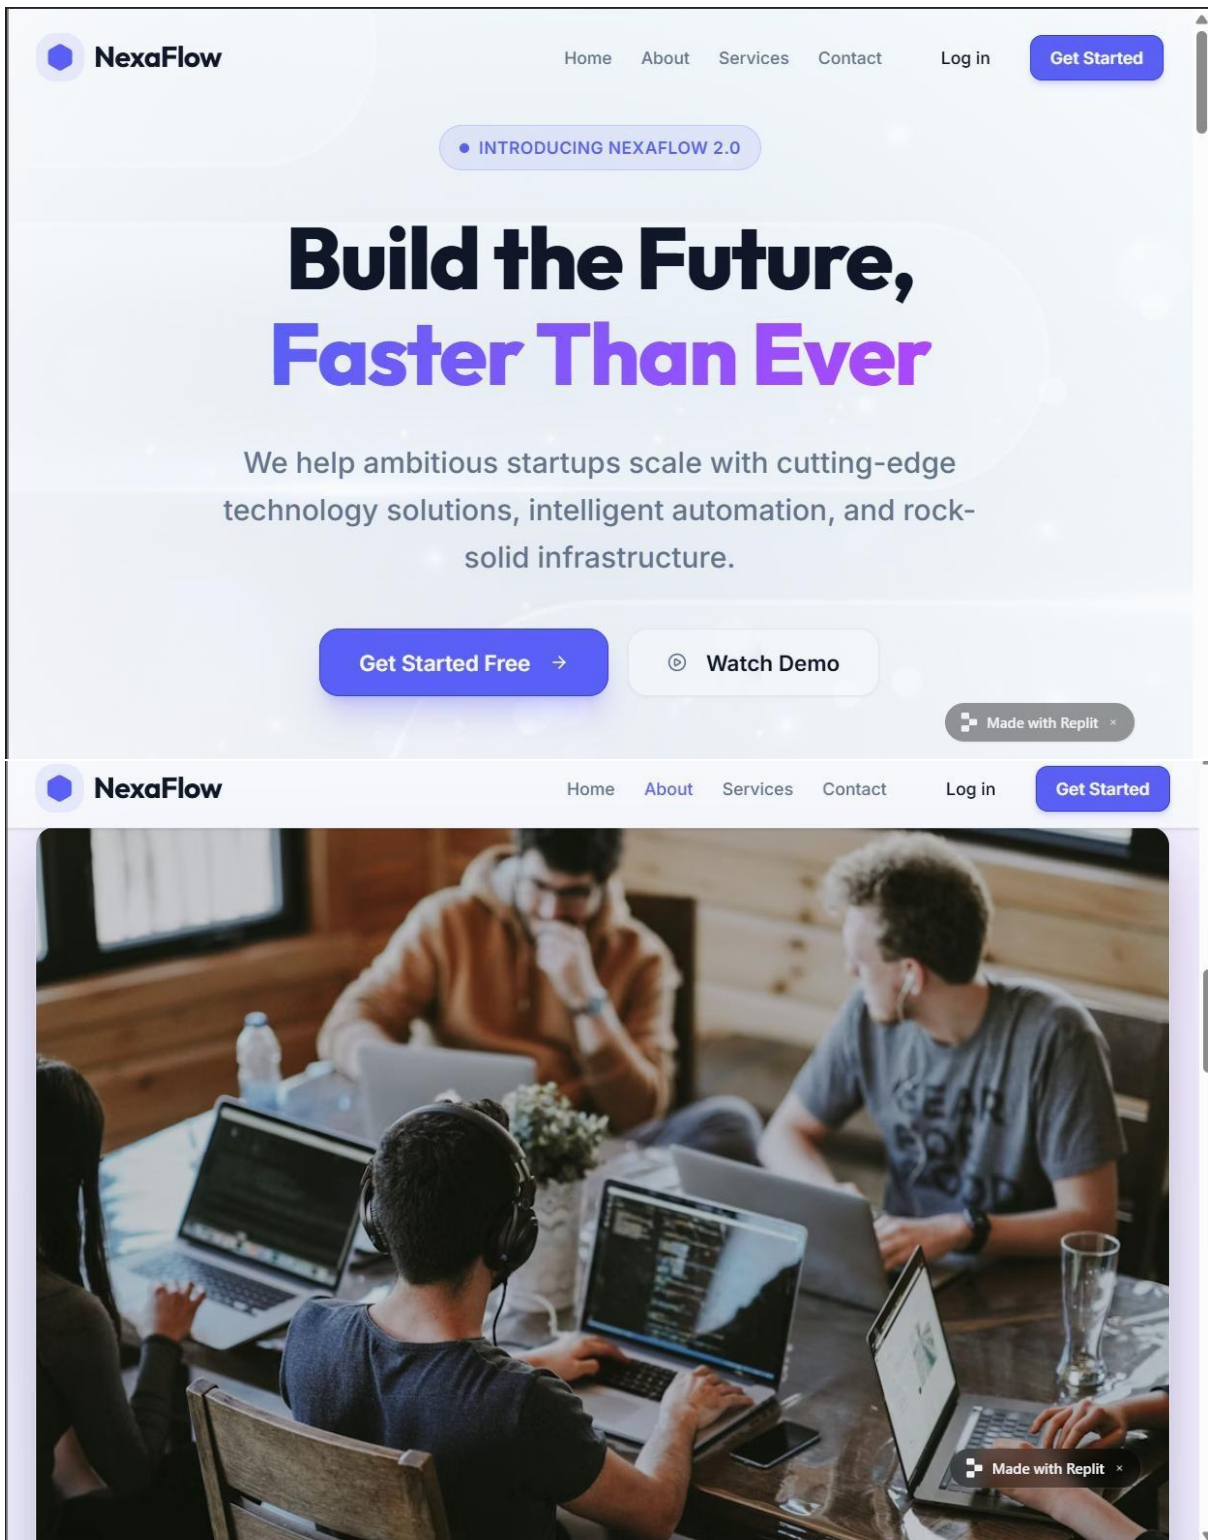

Task 2: Interactive Call-to-Action Button

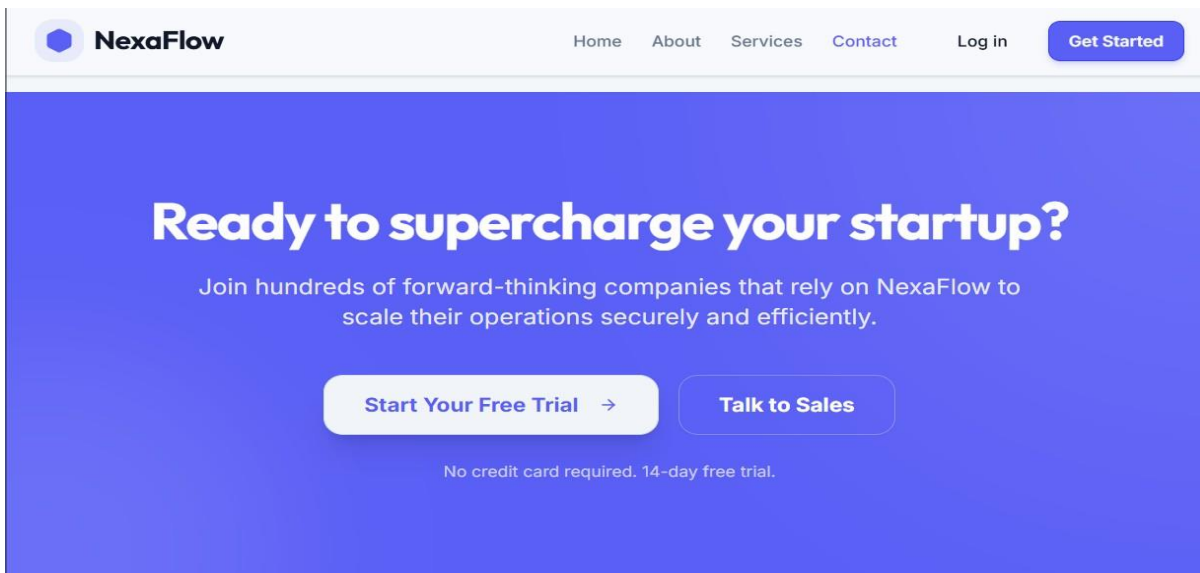

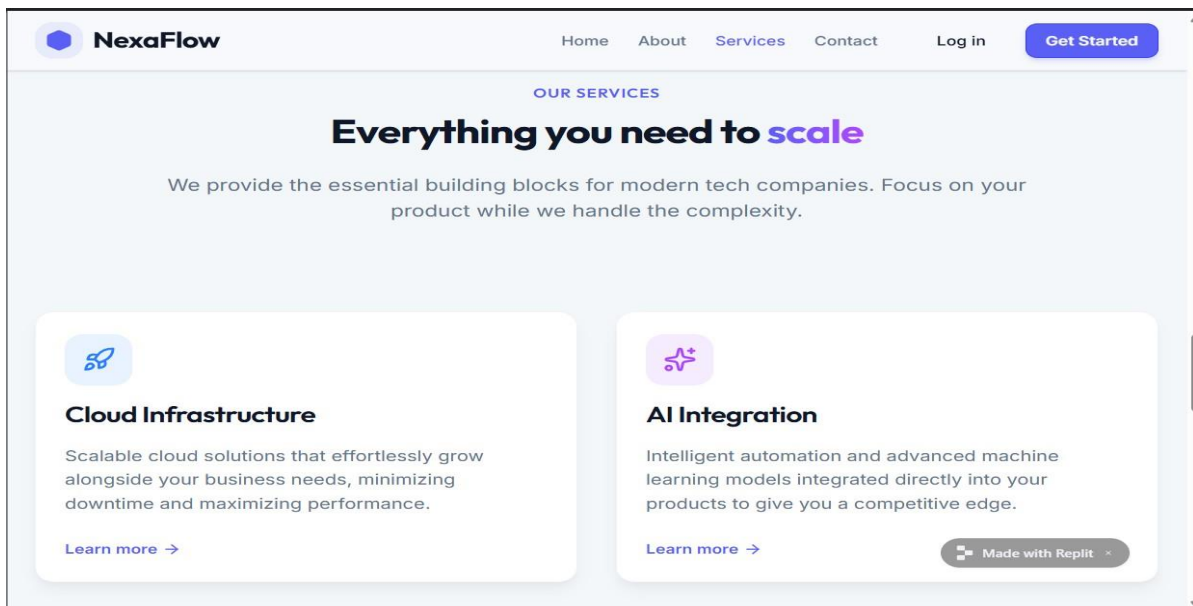

Scenario: A marketing page requires a call-to-action button that responds when users interact with it.

Prompt:

Design an interactive call-to-action button for a marketing page. The button should have hover, click, and focus effects (like color change, scaling, or animation) to improve user engagement. Ensure it is responsive, visually appealing, and accessible. Provide HTML, CSS, and optional JavaScript.

Output:

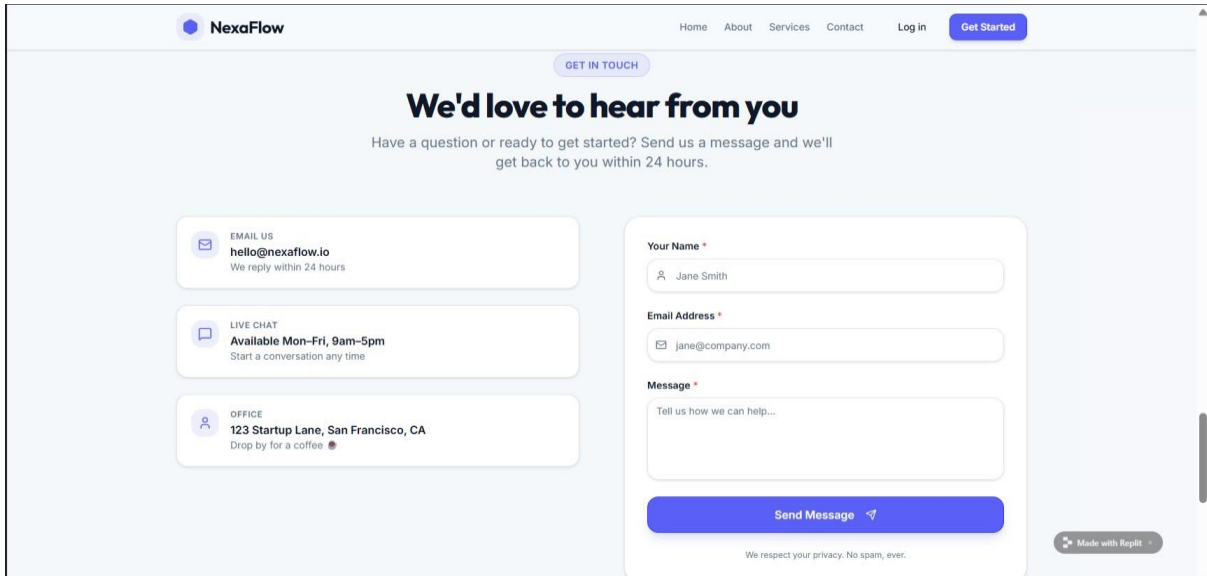

Task 3: Contact Form with Client-Side Validation

Scenario: You are developing a contact form for a company website to collect user queries safely and correctly.

Prompt: Design a responsive contact form with fields for name, email, and message. Implement client-side validation to ensure all fields are filled correctly (valid email format, no empty inputs). Show error messages and success feedback. Use HTML, CSS, and JavaScript.

Output:

=

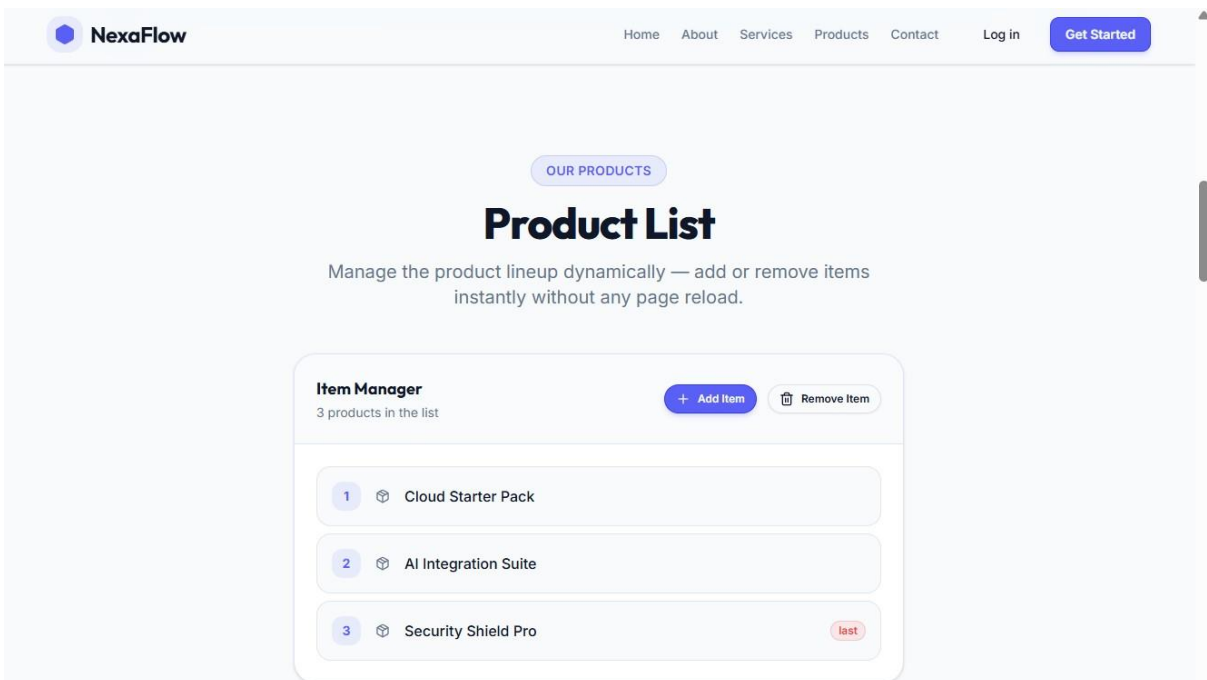

Task 4: Dynamic List Management for a Product Page

Scenario: A product listing page needs to add or remove items dynamically without refreshing the page.

Prompt: Design a dynamic product list page where users can add and remove items without refreshing the page. Use JavaScript to update the UI in real-time. Ensure a clean layout and responsive design. Provide HTML, CSS, and JavaScript code.

Output:

Task 5: Modal Popup for User Notifications

Scenario: You are building a user notification popup for announcements or alerts on a website.

Prompt:

Design a modal popup for user notifications that appears on button click or page load. Include a message, close button, and smooth animations. Ensure it is responsive and accessible. Provide HTML, CSS, and JavaScript code.

Output:
